Report Card

Design Philosophy

The above Application is created for the student who is one to five standard it is very straightforward to use for the student. all the content in the applications is easy to understand and use. It is only for the assignment which students must do.

First Page is the Home page

Home Page contains one image at the top which gives students good thought and information through the images. The application uses light blue color as a primary color because the light blue color looks very cool to the eyes this means exactly the right amount of light enters your eye. After that, there are various sections where users can move first one is the Assignment section where users get notification of the assignment. after that second is notice gives school-related notice. the third one is a report card that shows student marks in the assignment and also the result. The fourth one is the subject where the student gets all subject names.

After that last one is the footer which content home tab, Report Card tab, Search Tab, and the last one is the user profile. which are present on all pages so the user can easily shift from one page to another.

The Second page is the Assignment page

On the assignment page if any teacher posted their subject assignment then it shows a red mark there so the student recognizes the assignment if the student complete that assignment then it turns to the green tick it will show all the assignment of the subject which are posted by the subject teacher. The assignment colors are looking different it was just to feel different for the user's eyes.

The Third page is the Paper page

On the paper page, the user gives their assignment online where the teacher posted some questions which one by one given to the student. when the student clicks on any option then it turns green. If a student wants to go back to the previous question, then there is a prev button where the student goes back to the previous question or goes to the next question.

The Fourth page is the Notice page

On the notice page, It gives school-related notice. Any parent meeting or any other school-related notice provide here also attached any pdf file.

also if the user wants to check the previous notice then it will click on the prev button n then check the notice. the current notice also provides the date.

The Fifth page is the Report Card page

The report card shows subject and student marks in the assignment and also the result of the student where is the student is pass or fail in the assignment after that if the student wants to check their previous result then it will go to history and choose the subject which student wants to check there results in it also provides date where student complete their assignment.

The Sixth page is the Profile page

The profile page contains student information like name, school, standard, and the roll number and also provides class teacher information like name, a subject which teacher is conduct and the mobile number for contact.
